I am not in favor of eliminating Element 1. Those willing to make an effort to learn, can pass 5 wpm. Why should HF be accessable to those not willing to pass a 5wpm test. Just because other countries have done away with a code requirement is not a valid reason for us to do the same. I am not in favor of any of the Proposals RM-10805 through RM-10811. Might as well give out licenses to the General Population with these proposals.
How will these regulations be enforced? It will be very difficult.
